Thomas Jüngling, technology editor for WELT am SONNTAG, tested the Digta CordEx in conjunction with Dragon NaturallySpeaking and was enthusiastic about its speed and quality. He also emphasized the advantage of its cache:

„Very practical. When I got too far away from my computer, the device picked up my voice and recognized the words. When the microphone was hooked up to the computer again, the data was automatically transferred.“

Digta products give you the edge:

30 DAYS TRIAL

Test the digital advantage for yourself

You receive a dictation device (as a solution for one workstation) and a playback device for the typing pool - for a test period of 30 days.

Want to know more about digital dictation? Or test the advantages of digital dictation solutions „live“?
