#### shown actual size

### DS-3500°

- Increase efficiency and streamline operations.
- ▶ Intuitive push-button controls
- ▶ Real-time 128- and 256-bit file encryption
- ► Next-generation ODMS software
- ► Enhanced battery life
- ► Easy switching between dictation and conference recording (with external microphone)
- ▶ Large color LCD screen

- ► Intuitive push-button controls
- ▶ Voice Control Voice Actuator (VCVA) recording: Recording starts when sound is detected, ensuring you only capture what you need.
- ► Large, backlit LCD screen for consistent viewing even in bright conditions
- ► Superior audio recording in any conditions

- ► TRESMIC: Three microphones (two stereo-directional, one omni-directional) to capture low bass ranges with stunning clarity.
- ▶ 4GB of internal memory for 1,000-plus hours of worry-free recording
- microSD compatibility: Expand memory to 32GB
- ► MP3, WMA & PCM (WAV) recording support

- USB link compatible with PC and Mac: Easily download files to your computer.
- ► Calendar search function
- Large LCD screen with scene select functionality
- ► 2GB of internal memory; microSD compatible
- Built-in stand

- ➤ Compact and portable: WS Series recorders go anywhere and deliver outstanding audio quality.
- ▶ 90-degree directional stereo microphones
- ▶ 2-8GB of internal memory
- ▶ Compatible with microSD cards to 32GB
- ▶ USB direct link compatible with PC and Mac

# Whether you're gathering evidence, recording traffic violations or interrogating a suspect, a quality recorder means everything for police officers and law enforcement personnel.

Law enforcement officials are tasked with one of the most critical roles in our communities: keeping our families safe. To do that – and make the most of taxpayer dollars – it is essential that they complete their work efficiently and accurately. That's why more and more law enforcement workers are turning to Olympus Professional Dictation Systems and digital voice recorders.

#### WHY USE A DIGITAL RECORDER FOR LAW ENFORCEMENT?

For law enforcement officials, stakes are high and time is precious. Interviewing victims, suspects and witnesses is a difficult process where accuracy is of utmost importance. Manual note-taking is time-consuming and mistake-prone, and microcassettes reproduce sound poorly and wear out quickly.

Olympus Professional Dictation Systems and digital voice recorders, however, offer unparalleled audio quality, granular security features and out-of-the-box integration with existing tools. The result is accurate record-keeping that law enforcement officials can count on to improve their workflow in the office and out on patrol.
