

# Olympus Professional Audio Accessory

## RS-32 Hand Controller

Item# V4521210E000

It replaces the foot pedal for transcription use, and can be used to control recordings with Olympus Recorders - especially useful in conference recording setting.

Hands-on transcription  
from Olympus.  
**Dictation defined.**

### RS-32 | Hand Controller

Connection	USB
Computer Compatibility	PC or MAC

Packed with advanced features, Olympus' new RS-32 Hand Controller is a multi-function device that gives transcriptionists and Professional Dictation System users' hands-on control over their files.

Add ergonomic transcription functionality to any standard keyboard. Improve efficiency for non-footswitch users. Increase the functionality of your DS-7000 or DS-3500 handheld voice recorder by using it as a tethered remote control. However you deploy it, the RS-32 Hand Controller makes Olympus' industry-leading dictation and transcription equipment and software even better.

#### Versatile Functionality

The programmable function button layout lets you customize operation for every user.

All three buttons are programmable with ODMS Transcription Module (R6.2 or higher).

#### Ergonomic Wrist Rest

Simply designed to fit most standard keyboards, the RS-32 Hand Controller is comfortable enough for all-day use.

#### Nonslip Mat

The base of the RS-32 contains two nonslip urethane foam mats, ensuring the device stays in place – even under heavy use.

#### Box contents

- RS-32 Hand Controller
- Wrist rest
- USB cable
- ø2.5-DIN cable
- Instruction manual
